

■ The LCD Arm System is an ergonomic addition to any workstation that allows for perfect placement of your LCD monitor. The system's mount arm is fully rotational and swings 360° and tilts 60° both horizontally and vertically for perfect viewing adjustability and productivity.

Sleek and streamlined, this system is an ideal way to maximise viewing comfort by reducing eye, back and neck strain. Its compact design also reclaims valuable desk space as its cable management feature routes cables under arm and out of the way. Excellent for 15" to 21" LCD displays.

Item	: TR 111 LCD Arm
Colour	: Silver Metallic
Packing	: 1 Pcs / Ctn
