

TR 156

Radius Corner Power Cutter

The Radius Corner Power Cutter is mainly used for trimming the edge band corners and cutting away any excess of the edge bands. This machine is affordable, efficient, reliable and simple to operate.

The thickness of the cutting edge is 2mm (adjustable according to the thickness of edge band), whereas the guide strip and fence are perpendicular at 90° (angle can also be adjusted).

Technical Specifications

Trimmer Speed	24000 rpm	Dimensions	580x460x415 mm
Motor Power	350 w	Net Weight	27 kg
Voltage	220v - 240v	Frequency	50Hz
Pressure	4 - 6kg/cm ²
